

Baitable Beetle Trap – Clear Plastic – Honey Bee Equipment

Small hive beetles are a huge disturbance to a colony of bees. You should have great results with this trap. This trap hooks over the top bar of a frame and includes a middle compartment for bait. (A small piece of pollen patty works great as bait!)

Also, it is budget friendly and you can reuse it.

Honey Bee Equipment

Beetle Baffle – 10 Frame – Solid Wood

The Beetle Baffle provides a safe and effective way to prevent Small Hive Beetles (*Aethina tumida*) from infesting beehives.

The beetle baffle goes between the bottom board and hive body and creates a barrier that keeps the beetle from going up into the hive, yet it allows the bees to enter. The baffle confines the beetles to the bottom board and helps the bees to remove them.

A couple of ways to use the baffle are by placing it directly on the bottom board and one side on the bottom of the hive body or attach all four sides to a rim and place onto the bottom board. (The rim is sold separately)

Beetle Baffle – 8 Frame – Solid Wood

The Beetle Baffle provides a safe and effective way to prevent Small Hive Beetles (*Aethina tumida*) from infesting beehives.

The beetle baffle goes between the bottom board and hive body and creates a barrier that keeps the beetle from going up into the hive, yet it allows the bees to enter. The baffle confines the beetles to the bottom board and helps the bees to remove them.

A couple of ways to use the baffle are by placing it directly on the bottom board and one side on the bottom of the hive body or attach all four sides to a rim and place onto the bottom board. (The rim is sold separately)
