

NUC – Deep with Live Bees – Live Bees for Sale – Live Bees Sold

The Italian Honey Bee is the favored bee in this country.

They are known for their extended periods of brood rearing, Italian bees can build colony populations in the spring and maintain them for the entire summer. They are less defensive and less prone to disease than some of the other bee colonies.

Italian Honey Bees are excellent honey producers.

We can put together a Deep or Medium NUC with the Italian Honey Bees already installed and ready to work.

Marked Queen as Part of NUC (Deep or Medium)

The queen can sometimes be hard to locate among the other 10,000+ bees. If you are purchasing a deep or medium NUC, have the queen marked, so she will be a little easier to spot.

This year, 2019, the International Queen Marking Color is green.
