

Baggie Feeder Frame – 8 Frame – Beekeeping Equipment

This Wooden 8 Frame Shim is used for a Baggie Feeder. The “baggie” is usually an one gallon size sealable plastic bag (not supplied).

Feeders are used to offer syrup to the bees when the nectar flow is minimal/nonexistent. Feeders also provide a convenient way to medicate the bees. There are pros and cons to each of the many kinds of feeders.

Baggie Feeder Advantages: Very cost effective. Minimal to no drowning of bees.
