

5 Gallon Bucket

Our food grade plastic five gallon bucket is just what you need for storing your honey, until you are ready to bottle it.

You can also purchase a plastic honey gate, cut a hole near the bottom of your bucket, and insert it. Then you can bottle your honey straight from the bucket and store any not used, without switching containers.

Lid sold separately.

Childress Oxalic Acid Vaporizer

This Vaporizer is used in the fumigation of beehives for mites. It is used to heat oxalic acid (sold separately).

When heated, the mites absorb the acid's vapors which penetrate their blood stream; thus, killing them.

Frame Grip – Wooden Handle – Beekeeping Equipment

Our Frame Grip with the Wooden Handle is every bit as strong and durable as any we have seen. The wooden handle is easy on the fingers allowing you to squeeze tightly and get a firm grip on the frame.

Oxalic Acid Vaporizer

This Vaporizer is used in the fumigation of beehives for mites. It is used to heat oxalic acid (sold separately). When heated, the mites absorb the acid's vapors which penetrate their blood stream; thus, killing them.

Plastic Honey Gate

Our plastic honey gate (gate valve) will give you excellent control of honey flow when bottling and processing honey. Installs easy on your buckets or tanks.

Colors may vary.

6 Frame Manual Radial Honey Extractor

This honey extractor is a 6 frame manual radial extractor which holds deep, medium & shallow frames. This includes stand, is made of 304 stainless steel, durable and a handy piece of bee equipment to have on hand.

You provide the manual power to work this one! Less expensive than the electric but a little more energy and time involved.

Still, a great piece of beekeeping equipment for those beekeepers looking to harvest and sell their product.

6 Frame Electric Radial Honey Extractor

Here you see a 6 frame electric radial honey extractor which holds deep, medium & shallow frames. This includes a stand, is made of 304 stainless steel, also a durable and handy piece of bee equipment to have on hand.

This electric extractor saves time and energy while extracting honey from the bee hives during your busy harvesting season. All of these honey extractors come in various sizes.

A great piece of beekeeping equipment for those beekeepers looking to harvest and sell their product.

4 Frame Manual Radial Honey Extractor

This honey extractor is a 4 frame manual radial extractor which holds medium & shallow frames. This includes stand, is

made of 304 stainless steel, durable and a handy piece of bee equipment to have on hand.

You provide the manual power to work this one! Less expensive than the electric but a little more energy and time involved.

Still, a great piece of beekeeping equipment for those beekeepers looking to harvest and sell their product.

4 Frame Electric Radial Honey Extractor

This honey extractor is a 4 frame electric radial extractor which holds medium & shallow frames. This has legs attached, is made of 304 stainless steel, durable and a handy piece of bee equipment to have on hand.

This electric extractor saves time and energy while extracting honey from the bee hives during your busy harvesting season. Also, these honey extractors come in various sizes.

Still, a great piece of beekeeping equipment for those beekeepers looking to harvest and sell their product.
