

Triangle Bee Escape Board – 8 Frame – Honey Bee Equipment

Our Bee Escape Boards have a triangle shaped maze that makes it difficult for the bees to get back into the super quickly.

Bee Escape Boards sold in 8 & 10 Frame sizes. Sold individually.

Bee Escape Boards are used to separate the bees from the honey before harvesting. Bee Escape Boards are placed between the upper deep hive body and the supers that you want to clear the bees from. The bees can travel down to the brood , but they cannot easily crawl/fly back into the super.

Honey Bee Equipment

Triangle Bee Escape Board – 10 Frame

Our Bee Escape Boards have a triangle shaped maze that makes it difficult for the bees to get back into the super quickly.

Bee Escape Boards sold in 8 & 10 Frame sizes. Sold individually.

Bee Escape Boards are used to separate the bees from the honey before harvesting. Bee Escape Boards are placed between the upper deep hive body and the supers that you want to clear the bees from. The bees can travel down to the brood , but they cannot easily crawl/fly back into the super.

Bee Brush – Wooden Handle

This Bee Brush has long, super soft, flexible bristles and a wooden handle. You can gently brush the bees off queen cells, yet the bristles are firm enough to remove bees from frames, supers and clothing, without harming the bees. Each sold individually.

Honey Bee Equipment – Beekeeping Equipment

Baggie Feeder Frame – 8 Frame – Beekeeping Equipment

This Wooden 8 Frame Shim is used for a Baggie Feeder. The “baggie” is usually an one gallon size sealable plastic bag (not supplied).

Feeders are used to offer syrup to the bees when the nectar flow is minimal/nonexistent. Feeders also provide a convenient way to medicate the bees. There are pros and cons to each of the many kinds of feeders.

Baggie Feeder Advantages: Very cost effective. Minimal to no drowning of bees.

Beekeeping Equipment

Apivar – 10 Pack – Mite Treatment

A treatment for the Varroa Mite in the form of a rigid polymer strip impregnated with Amitraz.

Check out this link for a presentation of this treatment:

<http://arysta-hns-corp.com/download/apivar.pdf>

(When using miticides, following the package directions is very important and the use of protective gloves is recommended.)

Mite Treatment

Apistan – 10 Pack – Mite Treatment

Apistan is a treatment for detecting and controlling Varroa Mites in Honey Bee colonies.

Apistan is sold in 10 Pack packages.

(When using miticides, following the package directions is very important and the use of protective gloves is recommended.)

Mite Treatment

Apiguard – Single Pack – Mite Treatment

Apiguard is a patented, slow release gel ensuring a controlled dosage. This natural treatment is used to control Varroa Mite populations in honeybee colonies. The active ingredient, Thymol, is a naturally occurring substance derived from the thyme plant.

Apiguard is sold in individual packs or a box of 10.

Mite Treatment

Amino-B Booster – Pint – Honey Bee Supplies

Keeping your Bees healthy is important. Amino-B Booster contains a variety of amino acids which keep your Bees healthy, thriving and stimulates brood rearing.

This supplement can be used for feeding bees during times of colony dwindling, late winter, midsummer, and droughts.

Be sure to add Honey-B-Healthy® to your corn syrup or sugar water mix to help preserve it and reduce fermentation.

Honey Bee Supplies
