

Top Feeder – Double Compartment – 8 Frame – Assembled & Painted

This style of Top Feeder delivers syrup fast and can hold several gallons. The bees walk up through the center. The screen goes over the sides of the dam and down to the bottom of the pan which will help to prevent bees from drowning. The bees enter through the bottom of the feeder, drink the syrup, and have little risk of drowning with the screen present over the opening of the feeder! You will love this design! (Floats sold separately, but are not needed with the screen in place.)

Top Feeder – Double Compartment – 10 Frame – Assembled & Painted

This style of Top Feeder delivers syrup fast and can hold several gallons. The bees walk up through the center. The screen goes over the sides of the dam and down to the bottom of the pan which will help to prevent bees from drowning. The bees enter through the bottom of the feeder, drink the syrup, and have little risk of drowning with the screen present over the opening of the feeder! You will love this design! (Floats sold separately, but are not needed with the screen in place.)
